

SPANISH LESSONS
For foreigners

PURPOSE

Everyday we teach people, such as yourselves, who come from every professional field and this helps us to understand the realities of your profession.

We know you are always short of time, and for this reason our courses are based on efficiency and effectiveness.

You can start your course any week throughout the year. We tailor make courses for specific purposes such as presentations, negotiations or communication.

We begin by analyzing your learning skills and creating a special environment where you will learn, optimizing all your abilities.

Our links with industry are widespread and have provided us with a first class reputation since we began offering our services in 1988.
